

Mohamad Mahdi Tasha

Frontend Engineer · React · Next.js · TypeScript

Frontend Engineer with 6+ years of experience building and shipping production web applications for clients and product teams across travel, fintech, and productivity. Specialize in React, Next.js, and TypeScript, with hands-on ownership across UI architecture, API integration, responsive interfaces, performance, and production delivery. Comfortable taking ambiguous requirements from Figma and product discussions through implementation and deployment, collaborating directly with clients, designers, and backend engineers.

Experience

Sevin Team

Remote

Frontend Engineer

January 2025 - Present

- Build and maintain production interfaces from Figma and product requirements, delivering responsive and accessible experiences across multiple features.
- Design and maintain reusable component architecture that reduces duplicated UI logic and keeps frontend implementation consistent as the product grows.
- Debug and resolve complex frontend issues across state management, API integration, rendering behavior, and cross-browser compatibility.
- Collaborate directly with backend engineers to define API contracts and frontend requirements before implementation, reducing integration ambiguity and rework.

<https://sevinhost.ir/host>

Self-Employed / Freelance

Remote

Frontend Engineer

September 2020 – Present

- Work directly with clients to transform business requirements and Figma designs into production-ready web applications from initial scope through deployment.
- Translate ambiguous or evolving requirements into practical technical solutions, balancing product needs, maintainability, and delivery constraints.
- Build reusable UI components and frontend patterns that allow new features and pages to be developed consistently without unnecessary duplication.
- Integrate frontend applications with REST APIs, authentication flows, forms, validation, and application state while handling production edge cases.
- Manage communication and delivery directly with clients, clarifying requirements, proposing solutions, and adapting scope without losing focus on deadlines.

Projects

Safarnameh24 — Travel Booking Platform

2025 - Present

Built core search, listing, and booking experiences for a live travel platform, integrating REST APIs for real-time pricing and availability. Designed the frontend around chained asynchronous requests, granular loading states, caching, and optimistic UI to keep the booking experience responsive across mobile and desktop.

<https://safarnameh24.com/>

ZarvanTrip

2025

Built a travel search and booking experience covering hotel discovery, availability, selection, and checkout. Integrated backend booking APIs and handled evolving product requirements while maintaining a responsive and consistent frontend experience.

<https://zarvantrip.com/>

Finance System — Business Financial Platform

2025 - Present

Built data-heavy dashboards, forms, and validated data-entry workflows for a business-facing financial system. Developed reusable table and chart components and standardized form validation with React Hook Form and Zod as new views and workflows were introduced.

<https://finance.sevintm.com/>

Glyph

2026

Solo-built a lightweight WYSIWYG Markdown editor, solving the core technical challenge of keeping rich-text editing state in sync with raw Markdown output in real time. Handles Markdown parsing, rendering, and file export, structured for future extensibility.

<https://glyph-sigma.vercel.app/>

Brainmark

2026

Solo-built a productivity app for capturing and organizing ideas, architected around reusable, strongly-typed TypeScript components. Focused on interaction design and responsive behavior to keep the core capture-and-organize flow fast and frictionless.

<https://brainmark.vercel.app>

Relog — AI-Powered Developer Tool

2026

Built an AI-powered SaaS application that analyzes GitHub commit history and generates structured release notes. Implemented the full frontend workflow around GitHub API integration, asynchronous AI generation, categorized output, Tiptap-based editing, and Markdown export.

Skills

</>

Core Frontend

React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

⌘

UI Engineering

Responsive Design, Accessibility, Design Systems, Figma-to-Code, Tailwind CSS

📦

Application Development

REST APIs, API Integration, Authentication (JWT), State Management, Forms & Validation, React Hook Form, Zod, Zustand, Redux, TanStack Query

⚡

Performance & Quality

Performance Optimization, SEO, Debugging, Cross-Browser Compatibility

🔧

Engineering

Reusable Component Architecture, Frontend Architecture, Responsive Web Applications, Production Deployment

🔗

Tools

Git, GitHub, Figma, Vercel

Education

Islamic Azad University, Islamshahr Branch

Associate Degree (A.S.)

Computer Engineering

Islamshahr, Iran • 2023 - Present
